

LAND USE POLICY

Abdullah Abdin Factory is committed to conducting its operations in a manner that respects and protects areas of high cultural, ecological, or conservation significance. This Land Use Conflict Policy establishes guidelines to avoid operations in sites that may pose potential conflicts with land use, following accepted frameworks such as UNESCO Heritage Sites and International Union for Conservation of Nature (IUCN) categories.

This policy applies to all operations and activities undertaken by AAF that have the potential to impact land use, including site selection, development, and ongoing maintenance.

Identification of Sensitive Areas: AAF will utilize accepted frameworks, including UNESCO Heritage Sites and IUCN categories, to identify areas of high cultural, ecological, or conservation significance. An ongoing review process will be established to stay updated on changes to these frameworks and to incorporate new designations or categorizations.

Prohibition of Operations: Operations and activities that have the potential to conflict with the identified sensitive areas will be strictly prohibited and AAF will not undertake any activities that may compromise the integrity or values of UNESCO Heritage Sites or areas designated under IUCN categories.

Due Diligence: Prior to the commencement of any project or operation, AAF will conduct thorough due diligence to identify any potential land use conflicts. This due diligence process will include engagement with local communities, authorities, and relevant stakeholders to ensure a comprehensive understanding of potential sensitivities.

Continuous Monitoring: Continuous monitoring systems will be established to track changes in land use designations and to promptly adjust operations in response to any new categorizations or designations.

All employees, contractors, and partners of AAF are required to comply with this Land Use Conflict Policy. Non-compliance may result in disciplinary actions, including termination of contracts or employment

This policy was made publicly available on Abdullah Abdin Factory's website and communicated to all stakeholders to demonstrate our commitment to responsible land use practices.

Tariq Abdullah Abdin
